Product Description

Ceramic tiles are thin slabs of clay, silica, dyes, and other raw materials that are shaped and fired in a kiln to create a hard, durable surface finish. They are used for floors and walls in bathrooms, kitchens, and other areas of the home. Ceramic tiles are available in a variety of colors, sizes, and designs, including natural stone looks Ceramic tiles are popular with homeowners for their durability, timeless aesthetic, and relative affordability. On average, ceramic tile costs between 60-70% less than porcelain tile.

Product Description

Porcelain tile is made by exposing clay to searing hot temperatures — anywhere from around 2,300 to 2,400 degrees Fahrenheit! 1250 to 1320 C` unsurprisingly, porcelain is sometimes called a “high-fire” material for this reason. Because it is made at high-fire temperatures, porcelain tile is stronger than ceramic and can withstand more elements, which is why it often makes a great indoor and outdoor flooring choice. Water absorb level <0.05%.

Wall Tile
Porcelain wall tile is perfect for showers, bathroom walls, or even great for a fun accent wall in a living room. Wall tiles come in such a variety of designs that the design possibilities are endless. Porcelain tiles can mimic wood or

stone with exceptional realistic visuals perfect for wall installations.

Floor Tile

Porcelain floor tile is very popular due to its waterproof and pet-proof capabilities. It is an extremely durable flooring type. All durability aside, porcelain floor tile is diverse in design helping you achieve the bathroom or kitchen of your dreams!

Mosaic Wall Tiles

Mosaics are small pieces of porcelain tile laid out in a pattern on a mesh backing. The mesh backing keeps the design intact for installation. Mosaic tiles are eye-catching by design and are perfect for applications such as kitchen backsplashes or accent strips in showers.

Product Description

Porcelain is a popular choice for staircases, given its durability and versatility. The most important thing is that your staircase tile needs to be durable, since it will likely be in a high traffic area, and it therefore has to regularly withstand people walking up and down on it.
